12th International Conference on Geosynthetics

Geosynthetics, Leading the Way to a Resilient Planet
17 - 21 September 2023
Auditorium Parco della Musica, Roma (Italy)

Sponsorship and Exhibition Opportunities

Organised by: 

With the endorsement of:
Dear friends,

with great pleasure and honour the Italian Geotechnical Society (AGI) and the Italian Chapter of IGS (AGI-IGS) invite you to attend the 12th International Conference on Geosynthetics, which will be held in Roma, Italy, on September 2023.

Years after the successful EuroGeo 2, which was held in Bologna in October 2000, we cordially welcome your participation and kind support at this coming event in 2023. It is also a further pleasure to host the International Conference on Geosynthetics for us as 2023 marks the fortieth anniversary of the founding of the IGS.

The geosynthetics and geotechnical engineering community has reached full awareness over the last two decades, and the whole geosynthetics industry has focused on the sustainable use of geosynthetics in a variety of innovative as well as consolidated applications. After the theme of the 2018 Conference in Seoul on Sustainability, the ability to overcome the effects of the natural events, often related to climate change, and human activities forced to refer to a new keyword: Resiliency.

Hence the 12 ICG intends to become the base for the next step, therefore the conference theme will be:

**Geosynthetics, Leading the Way to a Resilient Planet**

The conference topics will address, through general and parallel sessions, keynote lectures and specific presentations, the most recent developments in geosynthetics, stimulating fruitful technical and scientific interaction among academicians, professionals, contractors, manufacturers, students.

We believe that the 12 ICG will provide an excellent opportunity to present recent experience and developments to an audience of engineers, geologists and consultants, public and private contracting entities, local national and international authorities, and to all those involved in research and practice related to geosynthetics.

The “Eternal City” of Roma does not need to be introduced being one of the most attractive and emblematic locations in the world, thanks to its impressive architectural heritage, must-visit Museums, pleasant weather and its extraordinary social life, not to mention the taste of the Italian food.

The conference will be held at the Auditorium Parco della Musica, situated at the heart of a budding cultural quarter in Roma, and designed by the iconic Italian architect Renzo Piano. The Auditorium is the biggest multifunctional complex in Europe and the second “cultural factory” of the world after the Lincoln Center in New York (United States). Moreover, the Auditorium hosts an ancient Villa dated 300 BC and a Museum making the Auditorium a real archaeological site.

The Eternal City will offer you a wonderful journey through Science and History!

**Do not miss the largest conference on geosynthetics in the world!**

Yours sincerely,
Auditorium Parco della Musica is situated in Roma, at the heart of a budding cultural quarter, which includes Zaha Hadid’s new contemporary art gallery “the MAXXI Centre”. The Auditorium was designed by the iconic Italian architect Renzo Piano, and it has been a success story since it opened to the public. With a plethora of new arts establishments cropping up all over the capital, Rome is flourishing in the grip of a new renaissance of the arts. Italy’s largest multi-arts centre has put Rome on the map, repositioning it alongside the great artistic capitals such as Paris, New York and London.
Italian Geotechnical Society (AGI)  
Since its founding in 1947, the Italian Geotechnical Society, Italian member of ISSMGE, ISRM and IGS, has been devoted to promoting, sustaining and coordinating research works and studies on soil characteristics related to engineering problems. In particular, the Society has committed itself to the following tasks:

- to inform its members about studies, the findings of research and development and data concerning Geotechnics, mainly through its official journal, the “Rivista Italiana di Geotecnica” (Italian Geotechnical Journal);
- to coordinate and disseminate information about studies and research work in the technical and scientific domains and promote the teaching of Geotechnics;
- to submit to both Academies and Public Bodies studies and proposals as well as call for measures concerning the Geotechnical aspects of local and general problems;
- to establish and maintain friendly and lasting relationships and forms of collaboration among people dealing with Geotechnics both in Italy and abroad (Bodies, Offices, Associations and individuals);
- to promote and encourage the creation of Geotechnical Research and Development Centres in Italy.

In order to accomplish these objectives the Association regularly organizes meetings, conferences and seminars, it promotes the training of groups of local and regional members, it assures the presence of its representatives in Bodies, Committees, Commissions, Meetings and Conferences; it also promotes the publication and dissemination of geotechnical studies by collecting information, data and findings.

AGI has been at the forefront in expanding geotechnical knowledge. The society regularly organizes national and international conferences and a number of workshops in order to facilitate academic and technological exchanges among members. In recent years, AGI has hosted a number of important Conferences, among which, the Second International Workshop on Evaluation of Eurocode 7 (Pavia 2010), the International Symposium on Geotechnical Aspects of Underground Construction in Soft Ground (Roma 2011), the International Conference on Performance-Based Design in Earthquake Geotechnical Engineering (Taormina 2012), the E-UNSAT European Conference on Unsaturated Soils (Napoli 2012), the International Symposium on Geotechnical Engineering for the Preservation of Monuments and Historic Sites (Napoli 2013), Coupled Phenomena in Environmental Geotechnics (CPEG) (Torino 2013), Workshop on Volcanic Rocks & Soils (Isle of Ischia 2015), the International Symposium on Landslides (Napoli 2016), the 7th International Conference on Earthquake Geotechnical Engineering (VII ICEGE) (Roma 2019), Eurock (Torino 2021), CPT’22 (Bologna 2022) and TC301 Preservation of Historic Sites (Napoli 2022).

International Geosynthetics Society (IGS)  
Founded in 1983, the International Geosynthetics Society is a learned society dedicated to the scientific and engineering development of geotextiles, geomembranes, related products, and associated technologies. IGS is a global community of about 4000 members including corporate, individual and student members and 44 chapters worldwide. IGS provides greater understanding of geosynthetic technology and promote its appropriate use throughout the world. IGS organizes an international conference every four years in order to provide a platform for advanced technology exchange between academia and industry, as well as giving full access, as benefit to IGS Members, to prestigious journals such as Geosynthetics International and Geotextiles & Geomembranes.
The International Conference on Geosynthetics has long history and tradition, the first International Conference on Geotextiles was held in 1977 in Paris. The conference has always been the best opportunity to show innovations from our industry to world experts.

**GENERAL OUTLOOK**

Title: 12th International Conference on Geosynthetics  
Dates: 17-21 September 2023  
Venue: Auditorium Parco della Musica, Roma, Italia  
Theme: Geosynthetics, Leading the Way to a Resilient Planet  
Organized by: Italian Geotechnical Society (AGI) and the Italian Chapter of IGS (AGI-IGS)  
Under the Auspices of: International Geosynthetics Society (IGS)  
Homepage: [www.12icg-roma.org](http://www.12icg-roma.org)  
Expected Attendance: More than 1,000 delegates from all over the world and 80 international exhibitors  
Program: Giroud Lecture, Keynote Lectures, Oral and Poster Presentations, Soccer Game, Technical Visits, Social Program, Young IGS Members Contest, Exhibition

**CONFERENCE ROADMAP**

**Important Dates**  
Paper Submission Deadline: October 31, 2022  
Paper Acceptance Notice: December 29, 2022  
Final Paper Submission deadline: March 30, 2023

**Important Dates for Sponsorship and Exhibition**  
Deadline for Sponsorship Applications: May 31, 2023  
Deadline for Exhibition Applications: May 31, 2023

CONFERENCE TOPICS

Geosynthetics, Leading the Way to a Resilient Planet

The session themes will refer, however are not limited, to the following topics:

T1 – Sustainability with Geosynthetics
T2 – Geosynthetics Properties and Testing
T3 – Soil-Geosynthetic Interaction
T4 – Durability and Long Term Performance
T5 – Reinforced Walls and Slopes
T6 – Basal Reinforced Embankments, GEC, Piles and Shallow Foundations
T7 – Seismic Design with Geosynthetics
T8 – Unpaved and Paved Roads
T9 – Railways and other Transportation Applications
T10 – Landfills and Remediation of Contaminated Sites
T11 – Filtration and Drainage
T12 – Erosion Control and Coastal Applications
T13 – Hydraulic Applications: Canals, Reservoirs and Dams
T14 – Innovative Materials and Technologies
T15 – Design Approaches and other Applications
T16 – Case Histories
T17 – Mining Applications
T18 – Tunnels and Underground Constructions
The program will include plenary sessions hosting distinguished Invited Lecturers, Keynote Lectures, Memorial and Honorary Lectures, Young IGS Members Contest, Exhibition. Parallel sessions for each theme will be opened with the presentation of a leading paper, selected among the submitted ones, and then will continue with the oral presentation. Other papers will be presented in poster session.

The international community of Geotechnics and Geosynthetics can finally meet in person after five long years. Since Seoul 2018 the world and the market have changed dramatically. Also IGS has developed new structures and new tools proposing new topics and suggestions for a harmonic development. The environmental themes have an ever growing importance in a scenario where the world economy is preparing an unprecedented global effort to recover after the pandemic. The 12 ICG conference and the related exhibition represent a unique and great opportunity to exchange experiences and knowledge, and to develop the business. The current individual and corporate members (about 4000 and 170, respectively) will have the chance to meet again, and the new entries will have an unparalleled occasion to create links and relationships with designers, academia, customers, learning and communicating in the world of Geosynthetics. Roma is a wonderful destination, easy to reach and full of attractions. The beautiful venue born to host music is the ideal place where to hear the sound of future.
WHO YOU WILL MEET AT 12 ICG

12th International Conference on Geosynthetics (12 ICG): above 1,000 participants, expected to come from over 50 different countries all around the world, will meet in Roma. People from Universities, Research Centers and Laboratories, Public Authorities and Agencies (governmental, infrastructural, environmental and economical) and of course manufacturers, distributors and construction companies will take part in the event, organized in an amazing location. Therefore the exhibition will be a fantastic opportunity for all the companies who will take an active part to promote brands, innovative products and solutions, thus generating business opportunities by meeting their customers, finally in person and face-to-face, and exchanging knowledge and technological innovations.

The event will be hosted by AGI (Associazione Geotecnica Italiana – Italian Geotechnical Society) and AGI-IGS (Italian chapter of IGS), with the support of the major Universities involved in Soil Mechanics, Civil, Environmental, Hydraulic, Materials Engineering, Tunneling etc.

Governmental Offices, National Infrastructures Authorities and Institutions, International Engineering Firms dealing with management of public works having national interests (such as big infrastructures projects), involved from development - to design - to construction are expected to be present.

Local Authorities and Institution, directly involved in supervision and construction works, together with project owners and facilities managers will be interested in having a view of the state of the art in Geosynthetics. The event will be an opportunity for Geosynthetic manufacturing companies to meet contractors and construction companies involved in civil, environmental, hydraulic engineering and architecture projects, as well as Design and Engineering companies, Planner and designers of civil and environmental engineering and architecture projects.

Also the presence of the most important University Departments related to civil engineering, soil mechanics, environment, hydraulic and architecture will give the opportunity to share and discuss with the participants the most recent research topics and to evaluate possible fruitful cooperation in new projects.
During the days of the conference (18 September 2023, 9.00am - 21 September 2023, 2.00 pm), an expo area will be available for companies specialized in technologies, products and services related to the world of Geosynthetics. The area will be an interesting opportunity to engage with public and private consultants, contractors, universities, designers participating in the conference.

The conference will be an excellent promotional tool for company working in the geosynthetic sector, providing the opportunity to meet and interact with the international scientific community and stakeholders and exchange experience on development, implementation and use of new techniques.

The conference will be an occasion for exhibitors to strengthen their position on the market and identify opportunities to build investments strategies, to strengthen relations with the media already present and active during the Conference, to develop new partnership and get in touch with new customers.

12 ICG in Roma offers a wide variety of exhibition and sponsorship opportunities that have been created to allow the companies to showcase their organization and enhance their own brand awareness as best suits their budget.

Other suggestions are welcomed.
The above specified benefits are subjected to change depending on circumstances and availability.
Booth Reservation & Assignment

IGS CORPORATE MEMBER EXCLUSIVE SELECTION DEADLINE: **15 November 2022** (23:59 of Italian standard time; +1UTC).

Please provide all of your choices for booth space. Booths are awarded based on IGS Corporate Member seniority. If you have not completed the form with all **5 preferred choices**, and none of your choices are available during the assignment process, you may forfeit your exclusive selection draft spot. Once the booth and sponsorship awards have been assigned, your company will receive an invoice and payment information.

Booths assignments will be distributed to IGS Corporate Members, who applied prior to the deadline, by **22 November 2022**.

Sponsorships and exhibit space will open to all remaining interested companies on 23 November 2022. IGS Corporate Members who do not participate in the Corporate Member Exclusive Selection Period forfeit the opportunity to select a booth based on seniority. After the Corporate Member Selection Period all remaining booths in the exhibition area will be assigned on a first-come-first-served basis.

Application Procedure

1. Please fill out the sponsorship / exhibition application form.
2. E-mail it to the 12 ICG Secretariat (**info@12icg-roma.org**)
3. Deposit 30% of the total amount within **30 days** after submission of the sponsorship / exhibition application form.
4. Pay the balance (**70%**) by **31 March 2023**.
5. All payments should be transferred to the following bank account:
   
   **Account holder:** Associazione Geotecnica Italiana  
   **Bank name:** Unicredit  
   **Bank address:** Piazza Testaccio 14 – 00183 Roma  
   **Full Bank account (IBAN):** IT 81 G 02008 05003 000110084846  
   **Bank account:** 110084846  
   **BIC/SWIFT:** UNCRITM1B54

   - Please, remember to state company name and reason of payment. You are also reminded that bank charges are made and are deducted by the bank before passing to AGI; it is therefore essential that all transfers of money include any surcharge. Deductions suffered by AGI should be paid onsite.
   - All benefits will go into effect after receiving your application and payment. We are limited by our conference schedule. If you apply after a schedule deadline, some benefits will not be available.
   - Full payment of the sponsorship and exhibition must be made on time.

Exhibition Fees

According IGS Bylaws and corresponding conference guidelines IGS Corporate Members receive a 20% discount on booth space.

Each booth will have the following size: **3m x 2m**:

- 1 booth for IGS Corporate member **Euro 6,800 + VAT**
- 1 booth for all the other companies **Euro 8,500 + VAT**

Payment Conditions and Cancellation Policy

In case of cancellation before **30 April 2023**, **50%** of full payment will be refunded. From **1 May 2023** nothing will be refunded.

Notification of cancellation of sponsorship and exhibition must be made in writing to the secretariat via e-mail.

Exhibitor Benefits

1 free Full Registration  
2 Exhibitor passes x day (including lunches and coffee breaks).
